ADJUSTABLE FAN TIMER

**Two timers in one – boost air quality, fight moisture**
Multi Timer Fan Control

This timer is designed to give you all the options, all the control you need, to make sure your bathroom gets all the ventilation it should have. It's really two timers in one: A countdown timer and a fresh home / Minutes Per Hour (MPH) timer – and, best of all, the two timers work together. The MPH timer sees when you've used the countdown timer and knows not to run the fan for a while if you've already done it. If you want to manually shut the fan off when the MPH timer is running, you can do that too, just by pressing the button.

Two Timers In One Control

The countdown timer can be set anywhere from 5 to 60 minutes, and it activates any time you manually turn the fan on. The MPH timer can be set to anywhere from 0 to 60 minutes, and it runs your fan for a set time every hour to expel stale air and help you maintain good indoor air quality.

Set How Long Your Fan Runs
